

**AI-Infused Talent**

- Launch NVIDIA supercomputer with at least two projects involving OC education partners to grow AI-infused/machine learning capability.
- Successfully compete and begin implementing, with partners, one state or federal multi-million dollar grant contributing to the expansion of an OC tech talent hub.
- Bring UCI, CSUF, Chapman, and CLAOC member companies together around increased engagement in project-based learning programs (e.g., capstones) contributing to developing and retaining talent in OC.
- Find 1-2 anchor sponsors for the AI Talent Development Center of Excellence.

**Policy & Infrastructure**

- Collaborate with similar, employer-led organizations and policymakers across the country to design the best ways to close the growing talent gap in America.
- Develop and launch a regional dashboard to track progress towards an innovative talent hub.
- Advocate for state and national support of innovative business-led, talent-related initiatives.

**Ecosystem Branding**

- Promote OC talent attraction and retention through partnerships formed to unify and strengthen branding of OC.

**Entrepreneurial Culture**

- Support the new CA \$200 million Fund of Funds to invest in SoCal Diverse VCs.
- Launch SoCal Master Fund 2 and additional Special Purpose Vehicles to invest in local startups.
- Develop and deploy a model to infuse entrepreneurship and innovation across all programming

**Experiential Learning**

- Deliver high quality Career Exploration Experiences for over 200 high school participants while building a best in class work-based learning model that is scalable.
- Link AWS and Google certifications plus Intel AI for Workforce curriculum to a skills based hiring approach with talent development among a few key CLAOC member companies. Provide one working model of each with a participating high school and community college.
